

The soft contours of the R model give it an elegant simplicity which allows it to blend easily with any interior. Its sleek styling will make it an admired feature of your home, even when it is not lit.

The R exists in three sizes and outputs: R24, R34 and R44. Each one comes in graphite or alumat color.

Nestor Martin stoves and inserts are designed to efficiently burn a variety of gas types. Whether you wish to burn natural gas, propane or butane, the R model, like all of the Nestor Martin stoves and inserts, can bring the most out of the fuel you choose. They have been tested to meet the strictest standards of efficiency and emissions.

R34 - Graphite

MODEL	R24	R34	R44
AxBxC (mm)	738x514x375	797x574x420	849x682x472
D (mm)	614	686	709
G Ø ext. - Ø int. (mm)	125/110	125/110	125/110
Weight (kg)	60	66	75
Max. heat output (kW)	6	7	9
Heating Capacity (m ³)*	75	90	115
Efficiency (%)	85	85	85
Certification	HR+ / EN613	HR+ / EN613	HR+ / EN613

* Approximate heating capacity, based on average insulation
All models can be vented from either top or rear of the stove
